Base, LPP, Pools and Demex Points

Multiple ways that you can capture rewards on Demex.

Base Trading League - Cross-Chain Trading

The Base Trading League, running until Feb 20th is in line with Demex's cross-chain expansion. Explore the perp markets and climb the leaderboard and get your share of the unlocked prize pool. Earn one point for every dollar of trading volume, with the top 20 traders eligible for rewards.

The Nitron Borrowing Strategy lets you put up your crypto as collateral to borrow USD, which you can then use to make bigger trades. Think of it like a leverage tool that helps you trade more with what you already have.

The Perpetual LP Strategy is about earning passive income by providing liquidity to trading pools, while also trading yourself. You can balance your risk by both trading and providing liquidity, earning rewards even when your trades don't go as planned.

\$DMX Tip:

- Perps Trading: Stack points through volume.
- Open Interest: The longer you hold a position, the more spins you earn.
- Nitron Lending: Earn spins by supplying & borrowing.

3	swth1...gkfhz ↗ all_in	\$1,278,288.95	1,278,288.95	120.00 USDC

Loss Protection Program - Trading with Confidence

Complementing the trading league, Demex has implemented the Loss Protection Programme (LPP) running concurrently until February 20th. This helps traders manage risk by partially offsetting trading losses through a \$1,000 prize pool. The distribution mechanism follows a fair approach – larger losses receive proportionally bigger shares of the protection pool.

The traders safety net for trading perps!

Safeguard your trades, Lock in your gains.

Perp Pools - The Safest Hedge

These perpetual pools serve as a strategic hedge during periods of reduced trading activity, capitalizing on market volatility to generate returns for liquidity providers.

→ app.dem.exchange/pools/perp

\$DMX Tip:

- Perp Pools: Deposit into pools & earn from your share.

\$DMX

Trade Perps, Lend/Borrow, Add Liquidity to Perp Pools > Stack Demex Points.
